Interdisciplinary Mathematics Education (Hill 2019-22) The open access book in the first major publication on the topic of “interdisciplinary Mathematics Education” and draws from the work of the first International Year (Study Group of the same name) in 2019-22. This book looks beyond the discipline and explores new approaches in the field. It includes contributions from international experts and provides insights into the complex issues and challenges in interdisciplinary education. This book is a valuable resource for educators, researchers, and policymakers in the field of mathematics education.

Historical and Multidisciplinary Perspectives on Hope (Van den Heuvel 2020-21) This open access volume makes an important contribution to the ongoing research on hope by combining insights from both the long history of the concept and the latest multidisciplinary research. The book explores the meaning and implications of hope from a variety of perspectives, including psychology, philosophy, religion, and social sciences. It is a valuable resource for researchers and practitioners interested in the study of hope.

The Emotional Power of Music (Cochrane 2013-18) This open access volume explores the impact of music on our emotions and mental health. It draws on insights from music psychology, neuroscience, and clinical psychology to provide a comprehensive understanding of the emotional power of music. The book is a valuable resource for musicians, researchers, and therapists interested in the therapeutic potential of music.

The Power of Music for Mental Health (Cochrane 2013-21) This open access volume explores the role of music in mental health. It draws on insights from neuroscience, psychology, and clinical psychology to provide a comprehensive understanding of the therapeutic potential of music in mental health. The book is a valuable resource for musicians, researchers, and therapists interested in the therapeutic potential of music.
